WS-No.2D DOUBLE WORKSTATION

SNAP-i PRODUCTS™

2020 Introducing the new Adagio double workstation that uses “SNAP-i” joints and an interlocking sequence of components, which is a new design concept for the furniture industry. The “SNAP-i” joint applies simple physics principles to join modular furniture parts seamlessly. It eliminates the need for joint fasteners and other adhesives, resulting in products that are environmentally friendly. The structure frame and support bases can be assembled quickly and easily without any tools (except connection of hardware). It is the first modular furniture that made by the new design concept, designed by Space Symphony. This innovative modular furniture design will begin a new chapter in the furniture industry.

INTRODUCTION

The “SNAP – i” joint structure is different from traditional joint types, which use joint fasteners and other adhesives for assembly. Each of the individual parts has slots; parts are mutually clamped when they are snapped into each other.

JOINT TYPE

PRODUCT ADVANTAGES

- ✓ Modular parts, simple part replacement.
- ✓ Saves resources and protects the environment.
- ✓ Easy to handle and transport.
- ✓ Flexible - quick and easy to assemble and disassemble without tools, saving time.
- ✓ Assembling is easy enough that anyone can do it.
- ✓ The appearance is simple, elegant with customizable décor panel designs.
- ✓ Long lifetime warranty.
- ✓ Simple and streamlined after sale services.
